This technical diagram illustrates the exploded view of a faucet assembly. The main assembly includes a curved spout (18090) at the top, which connects to a central body. Below the body is a long, braided flexible hose (23880) leading to a base. Various O-rings and seals (23988) are shown in their respective positions. A handle assembly (23990) is shown on the right, connected to a lever (23989) and a pin (13292). A separate component (23623) is shown near the central body. An inset box labeled 'Before 1-6-2020' shows a previous version of the assembly with a different seal (93042) and a different handle pin (93120).
